

Case Study: Burts Chips

Burts Chips Advance to The Cloud

The Challenge

Burts Chips needed a highly available system for their 24/7 factory to cope with their high production rates; they have total reliance on IT. Burts wanted to do this as an operational cost with no upfront investments on new server hardware.

Stem Cloud's Solution

Stem's solution for Burts Chips included:

1. 60 Virtual desktop users catering for the main office, factory and European based mobile sales force
2. Microsoft Windows 2008 R2 server
3. Microsoft Exchange 2010
4. Microsoft SQL server 2008
5. Sage Line 200
6. Offsite backup of data
7. High speed leased line internet access

Key Facts

About Burts Chips

Burts create hand fried potato chips in Devon. They use only the freshest, natural ingredients. The chips are cooked in small batches in pure sunflower oil to make them extra crunchy. They're then placed into "Buddy"; their unique flavour-coater.

Since their humble beginnings, Burts have gone from strength to strength, winning awards along the way. Quality is at the forefront of their vision.
