

Western Electrical move forward using Cloud Hosting

The Challenge

Western Electrical required a solution that provided maximum availability for their central IT systems. These systems provide critical business functionality to 9 branches, including the Plymouth based HQ.

Stem Cloud's Solution

Stem's solution for Western Electrical included:

1. Provision of Windows and Linux cloud servers
2. 100mbit direct connection into Stem Cloud
3. Microsoft Exchange
4. VPN connectivity to Western Electrical branches
5. Blackberry integration
6. Offsite backup of data
7. Business Continuity provided by Back2Business

Key Facts
